Call: +91-22-25685494 / 25652448

**First time in Mumbai;** a golden chance to interact with consultants of Six Sigma Alchemy in a free seminar on “Lean Six Sigma for Manufacturing Excellence”.

To find the answer and learn to understand why an Organization needs to adopt “The Integrated Approach” and how to create a Management System, which address these issues, please mark your calendar for this “Free Seminar” on 24<sup>th</sup> May.

### **WHY?**

Most companies in today’s competitive world use the following interventions as strategic levers to improve quality, reduce cost, improve profitability & establish market leadership.

- **Six Sigma:** for first time right in manufacturing/service processes
- **Lean:** for improving the work flow through waste / NVA elimination.
- **Balanced Scorecard:** Linkage between Strategy & daily work and monitoring through Scorecards.
- **Business Excellence Model:** use the frame work of Business Excellence to strive towards Excellence.

In 70 % of the cases, these initiatives are applied in a very fragmented way, which is short lived. The result is a short term gain and the benefits are not sustained.

In order to sustain the same, the improvement initiatives have to become the DNA of the Organization.
